

2606 SW3 TRICHLOR

DESCRIPTION	Slow-dissolving 90% concentrated chlorine tabs
SPECIFICATIONS	Product with highly stabilised isocyanuric acid base Continuous use progressively releases the chlorine stabiliser, slowing breakdown by up to 80%, even in pools exposed to sun Product dissolves in water in a weakly acidic reaction that helps keep pool water pH stable at optimal value
HOW TO USE AND DOSING	The product can be used with skimmers and chlorine feeders/dispensers. Skimmer: place a number of tabs inside the skimmer to achieve pool water chlorine level that complies with applicable regulations. Chlorine feeder/dispenser: fill the feeder with tabs and adjust the quantity of water that enters to achieve in the pool water chlorine level that complies with applicable regulations. Dosing: 4 tabs per 100 m ³ of water every 7 days. For better product yield ensure water pH value stays at 7.2. Consumption varies with temperature, light intensity, number of bathers and weather conditions.
SPECIFICATION	Appearance: White tab pH: 3.0 +/- 0.5 The data given above are typical manufacturing values and not a specification.
PRODUCT COMPATIBILITY	Do not mix with acid products! Do not use on surfaces and materials sensitive to water, alkalis and chlorine. If in doubt, test compatibility on a small, concealed area before use.
USE & STORAGE PRECAUTIONS	The product is formulated for professional use only. Store in original containers. Avoid extreme temperatures and exposure to sunlight. Consult safety sheet for further information on use and disposal.
CERTIFICATIONS/ CONFORMITY	The product does not contain surfactants
CHEMICAL COMPOSITION	Consult safety sheet for further information on product ingredients.
